+91 7066875998 | Mumbai, Maharashtra, India | Open to Bangalore / Remote

SUMMARY

Full-Stack Software Engineer with 2.5+ years shipping production features across React/Next.js and Python/FastAPI stacks on client engagements. Comfortable owning what I ship end-to-end: writing tested code, debugging in production, and working directly with clients and cross-functional stakeholders. Hands-on with AWS (S3, EC2), REST APIs, and relational databases, with a track record of contributing to personal and open-source projects outside of work.

WORK EXPERIENCE

Full Stack Developer / Consultant (Contract)

01/2024 – 06/2026

DevAnsh Digital Solutions LLP

Remote

- Developed production backend applications using Python and FastAPI, building asynchronous REST APIs (async/await) and integrating scalable backend services.
- Built and maintained full-stack features following Clean Architecture, shipping production-ready functionality and performance optimizations across the stack.
- Gained hands-on exposure to React, Next.js, and TypeScript for frontend feature work, and AWS (S3, EC2) for deployment and infrastructure tasks.
- Worked directly with clients and cross-functional stakeholders to gather requirements, design APIs, and deliver production solutions, using AI-assisted tools (Claude, GitHub Copilot) to speed up implementation and code review.

Mobile Application Developer

04/2025 – 06/2025

Snabbbit

Andheri, India

- Built the Snabbbit OG mobile app from scratch using Flutter & Dart, following modular architecture.
- Implemented role-based authentication, REST API integration, and secure local storage; collaborated with backend teams on API contracts.
- Optimized application performance by reducing widget rebuilds and improving asynchronous operations; participated in testing, deployment, and release management.

Mobile Application Developer

06/2024 – 04/2025

NymbleUp

Mumbai, India

- Developed and maintained production-grade SaaS cross-platform apps using Flutter & Dart.
- Migrated large modules to Clean Architecture, improving maintainability, testability, and scalability.
- Developed application modules integrating REST APIs, authentication, caching, and business workflows.

Technical Project Manager

03/2024 – 06/2024

Unovative

Mumbai, India

- Managed sprint planning, client communication, and project coordination across engineering teams.

SKILLS

Languages: Python, TypeScript, JavaScript, SQL, Java, Dart

Backend & Frontend: FastAPI (async/await), Node.js, Spring Boot, REST APIs, JWT, Docker, React.js, Next.js

Software Engineering: OOP, Design Patterns, SOLID Principles, Clean Architecture, Repository Pattern, Dependency Injection

Testing, CI/CD & Tools: pytest, JUnit, Mockito, GitHub Actions, Git, Postman, VS Code, IntelliJ IDEA

Cloud & Data: AWS (S3, EC2), PostgreSQL, MongoDB, SQL, Firebase

AI & LLMs: LLMs, Retrieval-Augmented Generation (RAG), Prompt Engineering, FAISS Vector Search, OpenAI API, Anthropic API, Gemini API

PROJECTS

Nexus AI Voice Agent

- Built a React + FastAPI admin dashboard (campaign management, live call monitoring, knowledge base) with JWT authentication and pytest-based unit tests for API reliability.
- Engineered a real-time conversational pipeline (Gemini 2.0 Flash, Deepgram STT/TTS) with a Retrieval-Augmented Generation (RAG) layer, building vector search pipelines over large document collections using FAISS and MongoDB for grounded, low-latency responses.

Employee & Department Management System — Java, Spring Boot, PostgreSQL

- Developed a layered Spring Boot application applying OOP and SOLID principles, with JWT authentication, role-based access control, and centralized exception handling.
- Implemented CRUD operations, pagination, and filtering; applied Repository Pattern, JUnit, Mockito, GitHub Actions (CI/CD), and Spring @Async for asynchronous processing.

GoodHabitsApp — Flutter Mobile Application

- Built a Flutter habit-tracking application using Firebase, BLoC, Clean Architecture, and Dependency Injection.

EDUCATION

Master of Computer Applications, Pune University (CGPA: 8.78)

2021 – 2023

Bachelor of Science in Information Technology, Mumbai University (CGPA: 8.88)

2018 – 2021
